

Our Team Specializes In:

Peripheral IV Starts

Instead of sending your patients out for IV access, call us to place those difficult lines.

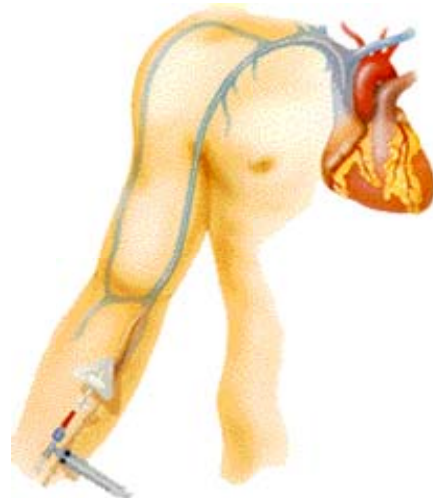

Lab Draws

If you are having difficulty getting your blood work drawn, contact us for an IV nurse to come to your facility for a lab draw.

Midline & PICC placements

If access is needed for one week, eight weeks or longer call us to place a longer term line.

If you have found your patient's catheter has broken at the hub, we can usually repair it, or do an exchange over a guide wire using the modified Seldinger Technique.

Port-a-Cath Access Central Line Care & Maintenance

The crucial elements in IV therapy are education, training, responsibility and accountability. Call us to provide our highly trained specialized nurse experts to enhance your skilled nursing facility.

Our I.V. Nurse team is proficient in the latest innovations in portable ultrasound equipment!

Portable ultrasound equipment is of *great* benefit to our clients by further reducing the need for costly and inconvenient trips to a hospital for interventional placement of PICC or Midlines. By using this technology our team can consistently decrease IV complications. Avoid many such results as local phlebitis which can result in the line being removed and restarted elsewhere. When the Midline or PICC is placed a few inches above the antecubital fossa it is not subjected to the stress and irritation of the arm being bent at the elbow during normal daily activities.

Patients can now be accessed through ultrasound technology, conveniently performed at their bedside by our registered nurse I.V. consultants.

Navigator

This truly is a great technological aid for accurately placing PICC lines. The Navigator System, made by Viasys Healthcare Medsystems, is designed to aid in the placement of central venous catheters (CVCs). By using this tool we can determine the approximate tip location of a PICC line.

Specialty Services

- ❖ IV Fusion Services
- ❖ Vascular Access Nurse Specialist available 24 hours a day 7 days a week
- ❖ 24 hour phone consultation
